

The Total Cloud/SaaS Automation Platform

**An investment opportunity
in one of the most disruptive tech start ups
in the exponentially growing “digital transformation” space**

Corent Technology, Inc.

August 2022

Corent's 3 "Software as a Service" products offer the only "end-to-end" automation platform in the exponentially growing "digital transformation" space

SurPaaS® is a sophisticated, patent protected, multi-cloud, deep technology platform that scans, models, transforms, migrates, and modernizes software applications on the Cloud. It's the foundation of all Corent products.

Application Migration & Modernization (Ideal for SIs)

Automated migration & modernization on the cloud of your choice.

MaaS scans, analyzes & migrates applications and data by understanding the application's internals, providing the opportunity to modernize and re-platform on the fly.

MaaS even automates the conversion of VM-deployed apps to containers.

Continuous Optimization & Management (Ideal for MSPs)

Manage and optimize cloud-deployed applications at scale, continuously.

ComPaaS delivers an application-aware, cloud-agnostic management and continuous optimization experience for MSPs and corporate IT departments.

ComPaaS users save an average of 30% of monthly cloud spend.

SaaS Enablement & Operations (Ideal for ISVs & Enterprises)

You provide the software. Let SaaSops take care of the rest.

SaaSops is the only no-code solution that transforms any software application to SaaS. Subscription billing, metering and multi-tenancy included.

SaaSops can even publish your SaaS on cloud commercial marketplaces without coding.

Digital Transformation Market to hit \$3.5 Trillion by 2028 with a Stellar CAGR of 22.1%

Partner Validation & Testimonials for Corent

"It's promising to see HPE and Corent Technology offer customers an easy migration path to Microsoft Azure Stack. The integration with Azure is the kind of technological solution that ensures their customers are in a position to succeed."

Tad Brockway
Corporate Vice President, Microsoft

"Corent is oxygen to software vendors with on-premise software applications."

Mike Culver
Cloud Strategic Alliances Manager
Amazon Web Services

Hewlett Packard Enterprise

"Corent SurPaaS is providing our global hybrid IT practice the ability to deliver both on-prem and public cloud IaaS and PaaS solutions with awesome functionality and performance."

Kevin Lange
Global Solution Lead, HPE Pointnext Consulting, Hybrid-IT WW Practice

"Corent has the broadest set of supported use cases in its class. All-in-one software platform that can discover, migrate, PaaSify, and SaaSify."

Christopher Kesik
Director Cloud Solutions

* IBM acquired Red Hat for \$34B in 2019

Corent Revenue Projections (2022-2025)

The revenue projections are supported by:

- 1) The established channel partnerships as they accelerate customer onboarding***
- 2) Co-branded sales/marketing activities with key cloud players like Amazon and Microsoft***
- 3) Corent expanding its go-to-market team to augment / accelerate the above***

Corent's Leadership Team

Feyzi Fatehi
Chief Executive Officer / Chairman

- A Silicon Valley veteran with 30+ years of leadership at HPE and multiple start-ups
- An inventor of the first Real-time Database
- Recipient CODiE Lifetime Achievement Award.

Shafi Syed
CTO, Co-Founder/Board Member

- 25+ years of Silicon Valley experience building teams in product development, technology, marketing, strategic solutions, alliances, and partner relations.

Sean Jazayeri
Senior VP, Strategic Alliances

- Over 30 years of experience in the IT and consulting industries, including CIO of Avanade, and the Director of Worldwide Operations for Microsoft Consulting Services.

Scott Chate
VP Partner & Market Development

- Over 25 years experience implementing business change including emerging technologies with global organizations including IBM and Oracle.

Jim Ganthier
Board Member/Senior Advisor

- 30+ years of Strategy, General Management, Marketing, Engineering, Operations leadership with P&L growth & scale results as Global VP at HPE & SVP at Dell Technologies .

Don Schiavone
Board Member/Senior Advisor

- Serial Entrepreneur with successful SaaS exits, Chief Operating Office, Author, Business Coach

Corent is raising a \$6M bridge financing to accelerate growth / revenue already in its customer/partner pipeline

- Corent has successfully raised \$32M so far, to build the solution, productize/patent it, and successfully prove its value proposition with initial customers via several world class cloud, systems integrators and go-to-market partners (with more to come).
- Corent is currently raising a \$6M senior convertible note to accelerate and close several \$1M pipeline contracts and to execute on a \$15M plus capital raise to build a world-class enterprise go-to-market team to further accelerate exponential growth.
- Investment units are \$250K each, have multiple appealing features including optional conversion to equity with an attractive discount.

Corent presents an unprecedented Social/Economic Impact by Democratizing SaaS

Similar to PayPal, Square, or stripe that democratized payment processing for everyday entrepreneurs, Corent's SaaSops™ democratizes SaaS by enabling thousands of entrepreneurs to easily offer their own SaaS (Software as a Service) solutions, in an automated, cost-effective fashion, enabling thousands of new SaaS start-ups, creating millions of new jobs, and enabling an unprecedented level of affordable access to commercial software delivered as a service to millions of businesses around the world, in turn empowering them to achieve their business goals and objectives.

Corent's SaaSOps™ was used to SaaS-enable Mifos – the world's leading FinTech open-source micro-credit/micro-finance solution

Tech alliance is helping rebuild shattered economies at the grass roots level by **democratizing FinTech** during the pandemic.
